## ABOUT GILSUN TECHNOLOGIES

Gilsun Technologies is a renewable energy private company registered in Tanzania specializing in the construction of biogas systems and small scale solar power. We consult, design, construct, and install renewable systems to provide clean, environmentally friendly, and affordable energy solutions to improve people's livelihoods.

### VISION AND MISSION

To be the leading renewable energy and environmental company.

Promoting clean energy for multiple purposes, reducing indoor air pollution, deforestation, and carbon emissions, and to make organic fertilizers.

### CORE VALUES

### OUR PRODUCTS & SERVICES

Construction, Installation of biogas systems and Supplies of biogas equipment.

Technical Training and Consultation on biogas and solar projects.

Design innovative biogas system through use of technology transformation

Educate about the use of organic fertilizer and Environment protection.

### OBJECTIVES

- To engage in commercial activities such as technical training and consulting in the fields of renewable and organic fertilizer manufacturing.

- To supply high quality renewable equipment.

- To reduce methane and carbon emissions while producing clean fuel for cooking and lighting.

- To promote the best environmental conservation practices and organic fertilizers.
